Experienced program manager and product architect. Specializes in simplifying complex problems in healthcare and financial tech. Has successfully shipped over 23 projects across iOS, Android, and web.

EXPERIENCE

Lead Technical Project Manager, *Rune Labs*

September 2021 - PRESENT

- **Director of project management for a rapid-growth neuroscience technology startup.**
- Manages a portfolio of 5 engineering teams and product backlogs.
- **Writes and refines requirements for the entire organization**.
- Runs agile ceremonies, and ensures the entire team shares a single, cohesive product vision.
- Works directly with engineering teams to resolve technical questions, mitigate risk, and translate business needs between departments.
- Protects projects from unnecessary increases in scope or complexity.
- **Overhauled and standardized company SDLC** and feature development pipelines to adhere to industry best practice.
- Directly responsible for the **first FDA certification for use of iOS and Apple Watch apps in clinical care of Parkinson's patients**.

Senior Product Architect, *WillowTree*

October 2018 - September 2021

- **Delivered world-class software, requirements, and project leadership** for multiple Fortune-500 clients. Proven history of quickly synthesizing unique regulations and policy frameworks (FINRA, HIPPAA, SOC2, WCAG, etc)
- **Research, pitched, and developed multiple open-source and social impact apps**, providing accessibility aids to marginalized communities and diversity training at Ivy League institutions.
- **Director of a 50+ member employee resource group.** Spearheaded diversity, equity, and inclusion initiatives. Provided mentorship at all levels of the organization.

Technical Project Manager, *ScoreShots*

August 2016 - October 2018
